```

Q1-Is the output above still considered a web transaction? Explain why the output of the **cat** command is in a different format than the single entry shown in item (a).

- Yes. The output is still considered web transactions because it records HTTP requests made by a client to a web server. The format is different because the log was generated by a different application or uses a different logging format.

```
analyst@secOps ~]$ sudo more /var/log/syslog
eb 10 21:10:55 labvm systemd[1]: Mounted Huge Pages File System.

```

Q2:- -----?

Lab - Locating Log Files

nginx -s reload
reopen log files.

DEBUGGING LOG

To enable a debugging log, reconfigure nginx to build with debugging:

```
./configure --with-debug ...
```

and then set the debug level of the `error_log`:

```
error_log /path/to/log debug;
```

It is also possible to enable the debugging for a particular IP address:

```
events {  
    debug_connection 127.0.0.1;  
}
```

FILES

- `/run/nginx.pid`
Contains the process ID of nginx. The contents of this file are not sensitive, so it can be world-readable.
- `/etc/nginx/nginx.conf`
The main configuration file.
- `/var/log/nginx/error.log`
Error log file.

```
[analyst@secOps ~]$ man nginx  
[analyst@secOps ~]$ ps ax |grep nginx  
 2040 ?        Ss          0:00 nginx: master process nginx  
 2041 ?        S           0:00 nginx: worker process  
 2042 ?        S           0:00 nginx: worker process  
 2130 pts/0    R+          0:00 grep nginx  
[analyst@secOps ~]$

Lab - Locating Log Files

Welcome to nginx!

If you see this page, the nginx web server is successfully installed and working. Further configuration is required.

For online documentation and support please refer to nginx.org.
Commercial support is available at nginx.com.

Thank you for using nginx.

```
analyst@secOps ~$ sudo tail /var/log/nginx/access.log

```

Welcome to nginx!

If you see this page, the nginx web server is successfully installed and working. Further configuration is required.

For online documentation and support please refer to nginx.org.
Commercial support is available at nginx.com.

Thank you for using nginx.

```
analyst@secOps ~]$ sudo journalctl -u nginx.service
Aug 16 23:53:08 labvm sudo[2851]: pam_unix(sudo:session): session opened for user root(uid=0) by (uid=1002)
Aug 16 23:53:08 labvm sudo[2851]: pam_unix(sudo:session): session closed for user root
Aug 16 23:53:26 labvm sudo[2857]: analyst : TTY=pts/0 ; PWD=/home/analyst ; USER=root ; COMMAND=/usr/bin/journalctl --since 10 minutes ago
Aug 16 23:53:26 labvm sudo[2857]: pam_unix(sudo:session): session opened for user root(uid=0) by (uid=1002)

Aug 16 23:54:22 labvm sudo[2864]: pam_unix(sudo:session): session closed for user root
Aug 16 23:55:22 labvm sudo[2873]: analyst : TTY=pts/0 ; PWD=/home/analyst ; USER=root ; COMMAND=/usr/bin/journalctl -f
Aug 16 23:55:22 labvm sudo[2873]: pam_unix(sudo:session): session opened for user root(uid=0) by (uid=1002)
```

```
[analyst@secOps ~]$ sudo systemctl restart nginx
[sudo] password for analyst:
Job for nginx.service failed because the control process
exited with error code.
See "systemctl status nginx.service" and "journalctl -xeu
nginx.service" for details.
[analyst@secOps ~]$ S
```

Lab - Locating Log Files

```
[analyst@secOps ~]$ sudo journalctl -u nginx.service -f
